

COMPANY EMPLOYMENT SCHEMES OBTAINED FROM THE CHAMBER OF COMMERCE SYSTEM

Friuli Venezia Giulia

Year 2021

Introduction

In line with the climate of economic recovery characterising the current year, an increase in employment needs by the Italian business system is expected. In fact, 61% of the total number of companies with employees in industry and services plan to hire workers in 2021, a percentage that is returning to the pre-pandemic level, after a significant decline in 2020. The inflow expected in 2021 - with any contractual form - is approximately 4.6 million units, thereby fully returning to the 2019 levels. This rapid recovery is also accompanied by an increase in the difficulty companies experience in recruiting the professional profiles they are seeking, which involves almost a third of the expected inflow and which can also be attributed to a growing level of experience requested from candidates. The major problems in recruitment will mainly concern specialised profiles: managers and specialists with in-depth knowledge, also of a scientific nature (about 40% will be difficult to recruit) and above all skilled labourers (46%).

This publication focuses on the main characteristics of the inflow planned in the region for the year 2021.

		NA T		<i>Ř</i>

Year 2021

COMPANY AREAS OF INCLUSION AND MAIN PROFESSIONS

This page shows the main company areas of inclusion, with several characteristics regarding inflow, and the professions most requested by companies for 2021 in the region. It should be noted that, unless otherwise specified, the professions indicated in the bulletin refer to the classification of professions of ISTAT CP2011 (3 digit).

Characteristics of expected inflow by business area in the region in 2021									
COMPANY AREA	INFLOW % of total (a.v.)		% up to 29 years	% difficult to recruit					
Total	99,840	100.0	30.7	41.4

MAIN CHARACTERISTICS OF WORKERS REQUESTED BY COMPANIES

The main characteristics of the incoming figures are summarised below, organised by sector. The data concerns the difficulties in recruiting, experience required, gender and type of contract requested; the figure for the region is compared with that of the geographical distribution and the national figure.

Difficulty in recruiting (%)	Reg.	North East	Italy		Experience requested (%)	R	eg.	North East	Italy
Total, of which:	41.4	38.6	32.2	2.2 Total, of which:		6	6.8	65.8	68.7

CHARACTERISTICS OF INFLOW BY AGE GROUP Expected inflow by age group in the region (%) up to 29 years indifferent 31% 27% over 44 years 7% 30-44 years 35%

% of young people up to 29 years against the total inflow:

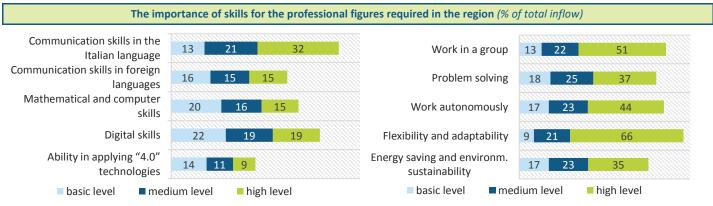

30.7%

A specific detailed study concerns the age groups of the professional figures requested by companies in the region in 2021, with a detailed breakdown of the professions most requested and of the main business sectors that plan inflow from the younger segment, i.e. the figures with an age explicitly indicated by companies as "up to 29 years". The report that includes "difficulties in recruiting" offers key ideas for analysis with regard to the relationship between training and companies.

The professions with the greatest difficulty in recruiting young people (expected inflow of young people - % share and a.v.)									
	recruiting young people Giulia region 41%	e difficult recruit yo people	ung voung people						
Customer reception, information and assistance staff	70%	240	340						
Designers, engineers and similar professions	66%	290	430						
Cooks, waiters and other tourist services professions	63%	3,350	5,350						
Warehouse management, logistics and purchasing staff	62%	920	1,470						
Specialists in computer, physical and chemical sciences	60%	400	660						
Shop assistants and other skilled personnel in large-scale distribution	59%	250	420						
Social welfare workers in institutions or at home	55%	770	1,400						
Administrative, financial and production management experts	51%	780	1,540						
Doctors and other health specialists	42%	240	570						
Economic and business management sciences specialists	40%	230	580						
The main business sectors see	king young people in	the region (%)

Other services for businesses and individuals	21	37	42						
□ Up to 29 years Indifferent 30 years and over 30 years to 29 years The top sectors for inflow of young people up to 29 years have been selected, as an absolute value									

SKILLS REQUESTED

A skill is the "proven ability to use, in work situations or in professional and personal development, a structured set of knowledge and skills acquired in formal, non-formal or informal learning contexts". This section analyses some of the main skills required by companies for incoming profiles, as well as an in-depth analysis of the main fields of study in the territory and the skills required for each of them.

The companies assign each skill a score from 0 (non-requested skill) to 4: the basic level corresponds to the percentage of companies that assign a score of 1 to that skill, the medium level a score of 2 and the high level a score of 3 or 4.

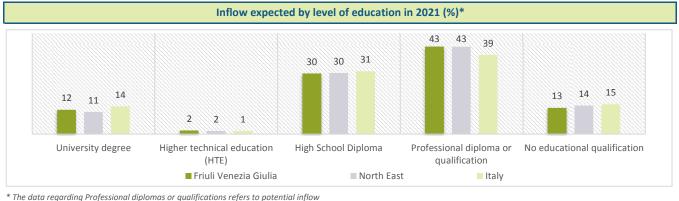

Skills considered of "hig	n" impo	ortance a	ccording	to the m	ain fields of	study in t	he regio	1*

Sales services specialisation	51%	21%	42%	69%	44%	5%	8%	2%	42%	19%

* The skills with "high" importance are those to which the companies assign a score of 3 or 4.

** The data refers to the potential inflow with a professional diploma or qualification. Please refer to the introductory text on page 6 "The fields of study that offer greatest job opportunities" for the definition of potential inflow.

FIELDS OF STUDY THAT OFFER THE GREATEST JOB OPPORTUNITIES

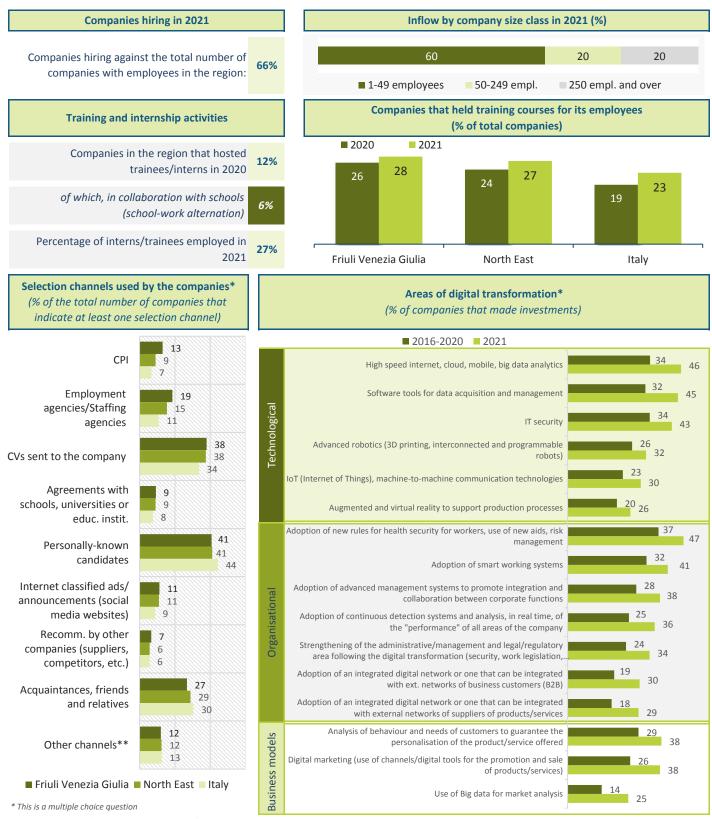

Below, there is some data related to the levels of education and qualifications most requested of the inflow of professional figures in 2021. Data on the demand for workers with professional diplomas or qualifications is presented based on two different approaches. In fact, in addition to workers with professional diplomas and qualifications expressly indicated ("explicit inflow"), companies are looking for workers who generically went through "compulsory education". With a specific in-depth study, there have been cases in which the request for workers who have generically gone through "compulsory education" was associated with professions for which there are three-year professional training courses formally included among the 26 in the State Regional Agreement of 1 August 2019. A further potential demand for professional qualifications was thus identified and, when added to the demand explicitly expressed by the companies as part of the survey, provides an overall estimate of the "potential inflow" expected by the companies for which a professional qualification is required.

The	fields of study most	highly requested in the	region		
		Expected inflow	% of the	% difficult to	% with
		(a.v.)	total	recruit	experience
Jniversity		12,000	12%	44%	82%

SEVERAL CHARACTERISTICS OF THE COMPANIES

This page presents several characteristics of the companies that are hiring, highlighting the relative share of the total number of companies with employees present in the region, and detailed breakdown by size class. The training carried out by companies for their employees in 2020 and 2021 and the share of companies that hosted trainees/interns in 2020 is also analysed. The page also presents some data on the investments made by companies in the various areas of digital transformation in 2021 and on the channels for selecting incoming personnel.

in newspapers, labour consultants, other channel

**Trade associations/trade unions, classified ads/announcements * Companies that declared they made investments of high importance for corporate strategies in the 2016-2020 period and in 2021 in relation to each aspect of digital transformation

Note on methodology:

The data presented comes from the Excelsior survey carried out by Unioncamere in agreement with the National Agency for Active Labour Policies (ANPAL). The survey, which is included in the National Statistical Programme (UCC-00007) among those that imply an obligatory response, has been carried out on a monthly basis since 2017.

The information contained in this bulletin was acquired by processing all the information obtained through the monthly surveys carried out up until August 2021, mainly by using the compilation technique in CAWI mode, carrying out approximately 282,500 interviews at companies, a representative sample of companies with employees in 2020 in the various industrial and service sectors. The main innovation introduced, starting from the 2017 survey , concerns the adoption of specific modelling of the historical series of data, obtained from administrative sources on businesses and employment and appropriately integrated with the sample data relative to each monthly survey, in order to assess the forecasted inflow. The concept of inflow (i.e. the number of work contracts that companies intend to enter into within a given period) and their relative characteristics has also been extended to the flow of collaborators, agency workers, and other non-salaried workers, in addition to the employment of salaried workers. The data regarding the forecast for the entire year therefore no longer come from a specific annual survey, but from the integrated processing of the available monthly surveys.

The projection of the data from the monthly surveys and the strengthening of the integration between these and the administrative data, through a forecast model, as previously mentioned, allow comparisons with the forecasts made in the years prior to 2017 only in trend and qualitative terms. In this bulletin, the analysis focuses mainly on the characteristics of the planned inflow in 2021, according to the professional profiles and levels of education requested. The results of the survey are available at provincial and regional level according to a variable number of economic sectors, obtained as a grouping of economic activity codes of the ATECO2007 classification. The distribution of inflow envisaged by "professional group" refers to the codes of the ISTAT CP2011 classification.

Excelsior Informa is created by Unioncamere in collaboration with ANPAL as part of the Excelsior Information System.

For in-depth information, refer to the following website: **http://excelsior.unioncamere.net** where data and analyses referring to all the regions and all the provinces is available.
