ITALIAN COMPANIES' DEMAND FOR PROFESSIONS AND TRAINING IN 2021

PROGETTO EXCELSIOR SISTEMA INFORMATIVO PER L'OCCUPAZIONE E LA FORMAZIONE

SECTION A	What professions are companies looking for?
Table 1	Inflow expected by companies in 2021 by professional group
Table 2	Inflow expected by companies in 2021 by corporate area of inclusion and professional group
Table 3	Inflow expected by companies in 2021 by corporate area of inclusion and main professions for each professional group
Table 4	Main characteristics of professions in 2021 by large professional group
Table 5	Intellectual, scientific and highly specialised professions requested in 2021: main characteristics
Table 6	Technical professions requested in 2021: main characteristics
Table 7	Office workers requested in 2021: main characteristics
Table 8	Skilled professions in commercial activities and in services requested in 2021: main characteristics
Table 9	Specialised labourers requested in 2021: main characteristics
Table 10	Plant operators and stationary and mobile machinery operators requested in 2021: main characteristics
Table 11	Unskilled professions requested in 2021: main characteristics
Table 12	Inflow expected by companies in 2021 at territorial level, by large professional group
SECTION B	What skills are companies looking for?
Table 13.1	Skills requested by companies in 2021 by professional group
Table 13.2	The skills that companies consider to be of "high" importance in 2021 by professional group
Table 13.3	The skills requested by companies in 2021 according to several main characteristics of the professions
Table 13.4	The skills that companies consider to be of "high" importance in 2021 according to several main characteristics of the professions
Table 14.1	Ability to communicate company information in Italian according to the degree of importance of this skill requested by companies for the main professions
Table 14.2	Ability to communicate company information in foreign languages according to the degree of importance of this skill requested by companies for the main professions
Table 14.3	Ability to use mathematical and computer languages according to the degree of importance of this skill requested by companies for the main professions
Table 14.4	Ability to use digital skills according to the degree of importance of this skill requested by companies for the main professions
Table 14.5	Ability to apply "4.0" technologies in order to innovate processes according to the degree of importance of this skill requested by companies for the main professions
Table 14.6	Ability to work in a group according to the degree of importance of this skill requested by companies for the main professions
Table 14.7	Problem-solving abilities according to the degree of importance of this skill requested by companies for the main professions
Table 14.8	Ability to work autonomously according to the degree of importance of this skill requested by companies for the main professions
Table 14.9	Ability to work with flexibility and adaptability according to the degree of importance of this skill requested by companies for the main professions
Table 14.10	Aptitude for energy saving and environmental sustainability according to the degree of importance of this skill requested by companies for the main professions
Table 15.1	Inflow expected by the companies in 2021 for whom each skill is requested according to the main professions
Table 15.2	Inflow expected by the companies in 2021 for whom each skill is requested according to the main professions

- Table 16.1
 Overall degree of importance with which each skill is requested according to the main professions
- Table 16.2
 Overall degree of importance with which each skill is requested according to the main professions

SECTION C What fields of study are requested by companies?

- **Table 17**Inflow expected by companies in 2021 by professional group and levels of education
- Table 18Difficult to recruit Inflow and outflow expected by companies in 2021 according to fields of study at post-
secondary, university level
- Table 18.1Explicit and potential inflow and difficult to recruit inflow expected by companies in 2021 according to
training qualifications or professional diploma specialisation
- Table 19Inflow expected by companies in 2021 according to fields of study at university, post-secondary and
secondary level and experience requested
- Table 19.1Explicit inflow and potential inflow expected by companies in 2021 according to training qualifications or
professional diploma specialisations and experience requested
- Table 20Inflow expected by companies in 2021 according to fields of study at university, post-secondary and
secondary level and skills requested
- Table 20.1Inflow expected by companies in 2021 according to fields of study at university, post-secondary and
secondary level and skills requested
- Table 20.2Explicit inflow and potential inflow expected by companies in 2021 according to training qualifications or
professional diploma specialisations and skills requested
- Table 20.3Explicit inflow and potential inflow expected by companies in 2021 according to training qualifications or
professional diploma specialisations and skills requested
- **Table 21**Inflow expected by companies in 2021 according to level of education at territorial level

SECTION D Other characteristics of inflow requested by companies

the (-) sign indicates the absence of inflow in the intersection indicated. the (--) sign indicates a statistically insignificant value. the totals do, however, include the data not shown.

SECTION C What fields of study are requested by companies?

In this section, the data relative to demand for education and professional training (certification courses or 3/4year professional diploma) are presented based on two different approaches regarding the meaning given to the indication of "compulsory education" as a level of education requested by the companies.

As well as university graduates, upper secondary school graduates (5-year high school diploma) and professionals with a diploma or qualification expressly indicated ("*explicit inflow*"), the companies seek workers who have generically frequented "compulsory education". Even though, according to today's common perception, the qualification associated with "compulsory education" corresponds to middle school (lower secondary school), in reality, in our system, following the 2006 reform, education is provided on a compulsory basis for at least 10 years and concerns the 6 to 16 years age group. At the same time, the legislation concerning the completion of compulsory education is aimed at obtaining an upper secondary school qualification or a professional qualification with a minimum three-year duration, by the age of eighteen.

Starting from these assumptions, the demand for professions for which companies request only compulsory education has been the subject of a specific study, verifying the cases in which this request is associated with professions for which there are three-year professional training courses, formally included among the 26 in the State-Regional Agreement of 1 August 2019.

With this methodology, a further potential demand for professional qualifications or diplomas was thus identified and, when added to the demand explicitly expressed by the companies included in the survey, provides an overall estimate of what we could indicate as "potential inflow" expected by the companies for which a professional qualification or diploma is required.

Table 17 - Inflow expected by companies in 2021 by professional group and levels of education (% share of the total)

				leve	ls of education	(% values):		
	- Inflow	university	higher	secondary	explicit i		potential	inflow**

500 employees and over	46.8	35.0	25.8	74.9

* This is a multiple choice question.

The (-) sign indicates the absence of companies in the intersection indicated. the (--) sign indicates a statistically insignificant value. the totals do, however, include the data not shown.

Table 51 -Companies that invested between 2016 and 2020 in products and technologies with greater energy savings and/or lower environmental impact of the investment by territorial distribution and size class (% share of business that made investments)
